RE: Illegal Fuels in Spec Racer Fords and Formula Enterprises Groups

Effective Date: Immediately – 2010 Season

USERA Sporting Regulations 1.15.1 and 1.15.2 define the fuel rules that govern all USERA events. In addition to these rules and any penalties for illegal fuel use that USERA may enforce at the event, officials from SCCA Enterprises will be collecting random fuel samples throughout the weekend for further testing.

The samples collected by SCCA Enterprises will be sent by SCCA Enterprises for official testing after the event. Any driver using fuel that fails to pass these additional tests may be assessed one (1) "Powertrain Violation" by SCCA enterprises for each collected sample that fails in testing.

Drivers and teams are reminded that receiving two (2) Powertrain Violations will result in a life time ban from the class by SCCA Enterprises.
